DETAILED ACTION

Allowable Subject Matter

1. Claims 1-34 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art fails to show a selective noise generating system, comprising: a digital-to-analog converter (DAC) that converts the digital output into an analog output comprising quasi-random noise having at least one low noise frequency band, the at least one low noise frequency band having respective associated shapes and center frequencies; and a frequency control that controls the delta-sigma modulator to alter one of the respective center frequency and the shape of the at least one low noise frequency band as called for in claims 1, 22 and 27. Therefore, claims 1-34 are allowed.

Conclusion

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John B Nguyen whose telephone number is (571) 272-1808. The examiner can normally be reached on 8AM-4:30PM M-F.
